ULSTERMAN U145

ULSTERMAN U145 was the calf at side when his dam, Flower N30, topped Millah Murrah's 2023 female sale at $140,000. Retained for use at Millah Murrah, Ulsterman has been used as a natural mating sire from 12 months of age, combining presence, masculinity & a gentle disposition. A bull that will add frame, he offers length, strong bone, excellent structure & sound sheath and testicles, built to work & last! From a data perspective, Ulsterman excels for structure, with absolutely no holes to be found across the full suite of EBV's.

VELOCITY V42 is the Rockstar from the recent run of Autumn sales in 2026. discovered by many astute cattlemen/women that toured the South as *'The most complete & balanced individual Angus bull in some time.'* His exceptional phenotype and performance profile created intense demand, culminating in a historic sale day where he set a new South Australian all-breeds record valuation of $235,000; knocked down to SARA PARK ANGUS - GLEN INNIS.
We have followed this bull and his famous Dam at Granite Ridge over the years and expect consistently well-made calves that will last, perform and compete at the top end of the market.
