Ulsterman U145 was the calf at side when his dam, Flower N30, topped Millah Murrah's 2023 female sale at $140,000. Retained for use at Millah Murrah, Ulsterman has been used as a natural mating sire from 12 months of age, combining presence, masculinity & a gentle disposition. A bull that will add frame, he offers length, strong bone, excellent structure & sound sheath and testicles, built to work & last! From a data perspective, Ulsterman excels for structure, with absolutely no holes to be found across the full suite of EBV's. He is a very easy bull to use on paper. His pedigree is exceptional, sired by Rector R53 from Nectar N334 (son of Coonamble Hector), with his dam Flower N30 recognised as one of the most influential young cows in Australian Angus history, making a major impact on the breed. Ulsterman's first progeny will sell at Millah Murrah's 2026 bull sale. He is breeding to kind, with a moderate to slightly later maturity pattern, extraordinary body length & heavy fleshing through the rear quarter. We expect some of the sale toppers will come from his sons.
